Gauges and General Licensed Devices  
(916) 323-5027

Machines must be registered within thirty (30) days of installation and it is Hologic’s responsibility to notify the purchaser/receiver of the requirement to register. Hologic must report to the state, quarterly, of all installations.

Operators must be licensed. The state (as of 10/97) is not issuing “special permits” to non-licensed non-RT operators who are trained by Hologic. A limited licensure test is available to anyone who has received training by Hologic or who holds a special permit prior to Sept. 1997. Non licensed operators, who either have received training by Hologic or hold a special permit prior to Sept. 1997 must attend additional training in order to comply with new regulations for the Limited Permit in X-ray Bone Densitometry. Please note that the contact for this additional training in Southern California is:

Trudy Papson  
Modern Technology School  
1232-38 E. Katella Avenue  
Anaheim, CA 92805  
(714) 978-7702.

Frankfort, KY  40621-0001
(502) 564-3700
Fax (502) 564-6533

Hologic Vendor Registration No. 157

Prior to the sale of x-ray equipment: (1)

The buyer (Facility) must register with the Cabinet for Health Services and be assigned a registration number.

1. If not currently registered the buyer must first contact the Radiation Health Branch to obtain a registration number. The information required would be taken by phone and a registration number assigned within 24 hours.

2. If the buyer possesses a current registration they must notify the Radiation Health Branch of the pending purchase and be advised of any additional requirements.

3. Radiation shielding plans are to be approved by the Radiation Health Branch prior to the installation of radiation producing equipment.

Note: The buyer (Facility) is responsible for registration and shielding plans. The buyer (Facility) registration number is assigned by location, not to individual x-ray machines.

Operators must be licensed

Customers may have to file variance requests with the State to obtain exemptions from the lead shielding requirements of standard x-ray devices for bone densitometers.

Hologic Training:

Hologic provides instruction on the proper operation and use of the x-ray densitometry system. Operator certification is obtained upon demonstration of competent application of the technology in the clinical environment.

The training provided by Hologic does not meet the State of Oregon requirement of 20 hours of radiation use and safety as required by OAR 337-010-0030 (2) (a).

The following information has been compiled from existing regulatory material at Hologic and to the best of our knowledge contains current information.
